For over 40 years, Hope Network Neuro Rehabilitation has been a leading provider of post-hospital, intensive, community-based rehabilitation services and specialized medical care for those who have sustained a moderate to severe brain injury or spinal cord injury, suffered a stroke, or have other neurological conditions.

TRANSITIONAL REHAB	NEUROBEHAVIORAL REHAB	DAY REHAB	OUTPATIENT SERVICES	RETURN TO WORK SERVICES	RESIDENTIAL LIVING
Intensive, specialized therapy in a community-based residential setting that addresses a patient's immediate need to redevelop skills and develop strategies to overcome physical, behavioral and cognitive challenges.	A post-acute inpatient program that focuses on reducing behaviors through specialized strategies and adaptations, providing participants the opportunity to overcome difficult cognitive challenges.	A personalized, comprehensive program that increases mobility, improves cognitive skills, and expands communication, language, and social skills through a combination of individual and group therapies and activities.	Individual treatment plans focus on improving physical and cognitive function, and other abilities to maximize independence.	Our Vocational Services help individuals reintegrate into the workplace by providing opportunities to develop and enhance their professional, social, and work-related skills.	Our residences provide individuals the opportunity to live in a safe and supported home-like environment that meets their care needs.
