

Why choose Hope Network Neuro Rehabilitation?

Recognized leader in brain injury rehabilitation. Dynamic continuum of services. Consistently achieves the highest level of CARF accreditation.

Improving patient outcomes is our priority. We strive to remain innovative and focused on providing high-quality, targeted, and cost-effective care.

Our Continuum Of Care

TRANSITIONAL REHAB

Intensive, specialized therapy in a community-based residential setting that addresses a patient's immediate need to redevelop skills and develop strategies to overcome physical, behavioral and cognitive challenges.

NEUROBEHAVIORAL REHAB

A post-acute inpatient program that focuses on reducing behaviors through specialized strategies and adaptations, providing participants the opportunity to overcome difficult cognitive challenges.

RESIDENTIAL LIVING

Our residences provide individuals the opportunity to live in a safe and supported home-like environment that meets their care needs.

DAY REHAB

A personalized, comprehensive program that increases mobility, improves cognitive skills, and expands communication, language, and social skills through a combination of individual and group therapies and activities.

OUTPATIENT SERVICES

Individual treatment plans focus on improving physical and cognitive function, and other abilities to maximize independence.

RETURN TO WORK SERVICES

Our Vocational Services help individuals reintegrate into the workplace by providing opportunities to develop and enhance their professional, social, and work-related skills.

Don't let distance get between your patient and the right level of care.

Sometimes, the best post-hospital rehabilitation option for your patient exists several hours away or across state lines. For those who have sustained a brain or spinal cord injury, or other neurological condition, Hope Network Neuro Rehabilitation offers intensive therapy and specialized medical care, and the ability to help discharge patients back to their home community.

Our rehabilitation solutions set us apart.

Not all post-hospital rehabilitation providers are able to provide or coordinate services for some of the medical and complex trauma conditions that follow a significant neurological event or injury. For these patients, Hope Network Neuro Rehabilitation developed Rehabilitation Solutions – strategies that address common problems often encountered in care management. Each strategy targets specific goals in a specialized, structured, and high-intensity rehab environment.

COMPLEX MEDICAL

Interdisciplinary, focused, and intense therapy solutions that concentrate on improving and restoring the functional capacity of an individual who has complex medical issues as well as a neurological condition.

BEHAVIORAL STABILIZATION

Short-term residential neurobehavioral-focused therapy that aims to stabilize a patient's psychiatric functioning allowing them to return to their prior level of care.

SUPERVISION REDUCTION

Interdisciplinary collaboration, with a focus on reducing the amount and type of care required by the patient with a brain injury, allowing discharge to a targeted placement or placement level.

CARE TRANSITIONS

Solutions focused on health stability and risk management when transitioning individuals with high care needs to their next level of care. The primary goal is to educate caregivers to ensure a smooth discharge transition no matter the placement.

Funding arrangements & insurance coverage

Our Funding Specialists and Admissions Team work collaboratively to secure funding arrangements for post-hospital neuro rehabilitation services through your patient's insurance carrier.

We are a contracted provider with many national and state-level payers. We accept and are successful with many types of funding sources, including:

- Auto No-Fault Insurance
- Michigan Medicaid Brain Injury Services Program
- Commercial Health Insurance
- Workers' Compensation

Contact our Admissions Team to learn more about Hope Network Neuro Rehabilitation, or to discuss a specific patient. A patient evaluation and plan of care is completed for each referral to ensure we are able to successfully assist with the management and monitoring of his or her current medical and rehabilitation needs.

For more details, or to schedule an evaluation, contact our Admissions Team.
