

Home & Community-Based Services

Individuals living with brain or spinal cord injuries or other neurological conditions may need support to help them live as independently as possible, whether in their own home or in a community setting. Routine care coordination is tailored to each individual, with support ranging from daily periodic checks to 24-hour assistance based on their needs.

What is Hope Network best at?

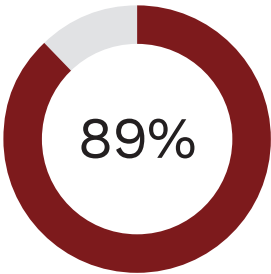

“Understanding my needs
and helping me with problems.”

— Resident

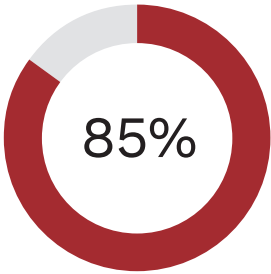

Education & Advocacy

Hope Network Neuro Rehabilitation is committed to advancing specialized brain injury care through injury prevention initiatives, advocacy to improve access to services, and ongoing staff education.

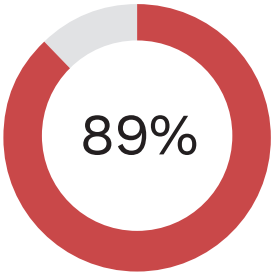

More than 150 team members have completed the Academy of Certified Brain Injury Specialists (ACBIS) training through the Brain Injury Association of America.

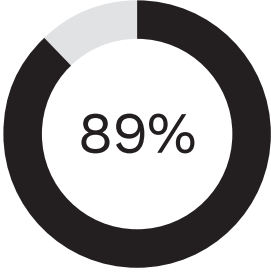

Felt satisfied with the services they received

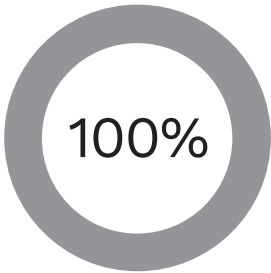

Felt happy with their involvement in decision making

Felt they have access to high quality services, staff, and support to meet their established goals

State they have maintained or improved their progress

Felt they live in a clean, comfortable, and safe environment

What is HNNR best at?

Providing me with excellent health, welfare, and safety”

— Resident
