

## NEUROBEHAVIORAL REHABILITATION

**DO YOU HAVE A PATIENT WHOSE BEHAVIORS ARE INTERFERING WITH RECOVERY?** It's not uncommon for an individual to experience uncharacteristic aggression, prolonged confusion, or an escalation of pre-existing mental health or substance abuse issues after brain injury.

Our unique, **post-acute inpatient program** focuses on reducing behaviors through **specialized strategies and adaptations**, providing participants the opportunity to overcome difficult cognitive deficits and continue their rehabilitation journey towards functional independence.

### PROGRAM FEATURES:

- Experts in behavioral intervention
- Individualized behavior plan development and ongoing monitoring
- 24-hour, 1:2 staff to resident ratio
- 24/7 nursing support
- Psychiatric intervention in collaboration with psychology support
- On-site board certified behavioral analysis
- Comprehensive clinical services
- Integrated electronic behavioral data monitoring and prompting
- Low-stimulus, controlled environment
- Wander management system and scheduled safety monitoring
- Supervised living and treatment areas
