

OUR EXPERTS CAN MANAGE PATIENTS WITH COMPLEX MEDICAL ISSUES

Not all post-hospital rehabilitation providers are able to provide or coordinate services for some of the medical issues that follow a significant brain injury, spinal cord injury, or other neurological event or injury.

We have nurses available to assist with the **monitoring, coordinating and delivery of services** to treat medical complications that often accompany a significant neurological event.

A patient evaluation and plan of care is completed for each referral to ensure we are able to successfully assist with the management and monitoring of his or her current medical acuity.

Questions? Call our Admissions Team at 855.407.7575.

WE BELIEVE IN COMEBACKS.
